 San Francisco, CA

PROFESSIONAL SUMMARY

Recent Computer Science graduate with strong foundation in full-stack development and modern web technologies. Demonstrated ability through academic projects and internships in developing scalable applications, optimizing system performance, and delivering high-quality solutions. Expertise in React, Node.js, and cloud technologies with strong problem-solving abilities.

CORE COMPETENCIES

Programming Languages: JavaScriptPythonJavaC++TypeScriptSQL

Frontend Technologies: ReactVue.jsAngularHTML/CSSBootstrapTailwind CSS

Backend Technologies: Node.jsExpress.jsDjangoPostgreSQLMongoDBREST APIs

Tools: GitDockerAWSLinux/UnixVS CodeAgile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineering Intern • TechCorp Solutions • June 2023 - December 2023

- Led full stack development of 3 major web applications serving 50,000+ active users, resulting in 40% increase in customer engagement and 25% improvement in user retention
- Architected and implemented microservices infrastructure using Docker and Kubernetes, reducing deployment time by 60%
- Mentored 5 junior developers and conducted code reviews, improving team productivity by 30%
- Optimized database queries and implemented Redis caching, achieving 70% improvement in application response time
- Collaborated with UX team to implement user-friendly interfaces based on user feedback, resulting in 35% increase in user satisfaction scores

Freelance Web Developer • Various Clients • January 2024 - Present

- Architected and developed responsive e-commerce platform using React.js and Node.js, processing \$5M+ in annual transactions with 99.9% uptime and sub-2-second load times
- Integrated third-party APIs including payment gateways and shipping services, reducing checkout abandonment by 25%
- Implemented automated testing suite with 90% code coverage, reducing production bugs by 80%
- Built real-time chat feature using WebSocket technology, increasing user session time by 45%

Teaching Assistant • University Computer Science Dept • September 2023 - May 2024

- Assisted in teaching programming fundamentals to 150+ students
- Conducted code review sessions and debugging workshops
- Developed supplementary learning materials and coding exercises
- Mentored students in data structures and algorithms
- Improved student pass rate by 15% through additional support sessions

KEY PROJECTS

E-Commerce Platform | [GitHub Link] | [Live Demo] | [React.js, Node.js, MongoDB, Stripe API, AWS]

- Built comprehensive online marketplace with user authentication, shopping cart, and payment integration
- Implemented secure user sessions and data validation, ensuring PCI compliance
- Achieved 4.8/5 user rating with 1000+ registered users in first 6 months

Task Management App | [GitHub Link] | [App Store Link] | [React Native, Express.js, PostgreSQL]

- Cross-platform mobile application with offline functionality and real-time synchronization, supporting 1,000+ concurrent users with 95% crash-free sessions
- Integrated push notifications and calendar sync, increasing daily active users by 200%
- Featured in local tech meetup as example of excellent mobile development

AI-Powered Code Analyzer | [GitHub Link] | [Python, TensorFlow, Flask, Docker]

- Machine learning tool for code quality assessment and suggestions
- Trained model on 100,000+ code samples, achieving 85% accuracy in bug detection
- Used by 50+ developers in open-source community

EDUCATION

Bachelor of Science in Computer Science | State University | 2021 - 2024

GPA: 3.8/4.0

Relevant Coursework: Algorithms, Database Systems, Software Engineering, Computer Networks, Machine Learning, Operating Systems

CERTIFICATIONS & ACHIEVEMENTS

Certifications:

- AWS Certified Solutions Architect - Associate (2024)
- Google IT Support Professional Certificate (2023)
- freeCodeCamp Full Stack Developer Certification (2024)

Recognition:

- Dean's List: Fall 2021, Spring 2022, Fall 2023 (3 semesters)
- Outstanding Student in Computer Science - University Award (2024)
- Hackathon Winner - "Best Technical Implementation" (2023)

Open Source Contributions:

- Active contributor to React.js documentation (15+ accepted pull requests)
- Maintained project with 500+ stars on GitHub
- Regular speaker at local developer meetups

Relevant CourseWork

Data Structures & Algorithms, Database Systems, Software Engineering, Computer Networks, Machine Learning, Operating Systems

TECHNICAL PROJECTS & LEADERSHIP

Personal Finance Tracker

- Full-stack personal finance management app with expense tracking, budget planning, data visualization, and financial insights.
- Features secure user authentication and data encryption.

Social Media Clone

- Instagram-inspired social media platform with image posting, real-time messaging, user profiles, follow system, and responsive design.
- Implements modern web development best practices.

Recipe Finder App

- Mobile-responsive recipe discovery app with ingredient-based search, meal planning, nutritional information, and personal recipe collection.
- Integrates with multiple food APIs.

Task Management App

- Collaborative task management application with real-time updates, drag-and-drop functionality, team collaboration features, and responsive design for all devices.

AWARDS & RECOGNITION

- Outstanding Student in Computer Science - University Award (2024)
- Hackathon Winner - "Best Technical Implementation" (2023)
- Dean's List (3 semesters: Fall 2021, Spring 2022, Fall 2023)
- Google HashCode Coding Competition - Top 15% globally (2022, 2024)
